NARVA Makes A Bold Statement With Rear Lighting

NARVA has relaunched its classic Model 43 rear automotive lights with the latest in L.E.D. advancements.

The new Model 43 range retains the smooth, round lens shapes, but top versions now incorporate a red L.E.D tail ring that helps to make them stand out in day time, as well as at night.

The Model 43 indicator, stop and reverse lamps are popular as both original equipment and retro fitting to coaches, trucks, motor homes, caravans and box trailers.

In revamping the range, NARVA has designed the new Model 43 to cover a number of budget options with a choice of 130mm base, as well as the more upscale, larger 150mm contoured base with amber, red or white lamps, each with polycarbonate lenses.

The 12-Volt 130mm entry-level models are available with a white base and 0.3m of non-sheathed cable, making them ideally suited to the caravan and box trailer market. A multi-voltage option is also available in the 130mm range with a black base and 0.5m of sheathed cable.

As with the smaller lamps, a number of enhancement options are available in the 150mm range. These elegantly styled models offer a larger contoured white mounting base with a surrounding white ring in the 12-volt lamps versions, or an upmarket chrome ring in the 9-33 multi-volt version. Each is hard wired with 0.3 or 0.5m of non-sheathed or sheathed cable respectively.

Top-of-the-range lamps in the series are truly class leading in style and performance. They incorporate 9-33 multi-voltage circuitry, an impressive L.E.D tail lamp ring that creates a high-end, neon-like appearance, and clear lenses that provide a uniform appearance when in operation or inactive. The lamps are hard wired with 0.5m sheathed cable and are surface-mounted in a 150mm contoured base. All lamps in the series are fitted with an integrated mounting gasket and are rated IP66 and IP67, making them ideally suited for commercial applications.

“Within the new Model 43 range there is a stylish lamp for virtually every application and budget,” says NARVA New Zealand’s Bruce Walker.

“These advanced designs set a new standard, offering exciting fresh styling options for coach, commercial and recreational vehicle manufacturers.”

NARVA’s new Model 43 Lamps are available from leading automotive outlets throughout New Zealand.
