October 2010

## NARVA's amazing range highlighted in New Product Catalogue

The sheer number and diversity of NARVA's product range of new and innovative products is highlighted in the release of the latest 76-page New Product Catalogue in New Zealand.

With technologies continuing to drive the development of a vast array of products, the New Product Catalogue showcases these within the well known NARVA colour-coded product groups.

Among the highlights are the recently upgraded Ultima 225 driving lamps in the sensational new packaging; 'Extreme' - the seriously tough driving lamps, which are also available in high impact packaging; Free Form headlamp units with modern appearance and improved light output; Emergency lighting including high powered L.E.D Work Lamps and Bars; 'Pulse' Class 1 L.E.D Strobes and the latest L.E.D School Bus Warning Lamps.

High intensity, heavy duty L.E.D work lamps listed in the catalogue have literally lifted the bar through their unrivalled lighting performance and reliability. Designed for

# **NARVA<sup>®</sup>** *Press Release*

applications in demanding operational conditions such as mining, contracting, forestry etc, flood beams range from 4,500 Lumens to an astounding 15,000 Lumens output.

The L.E.D truck and trailer lamp section introduces a myriad of new lamps such as the advanced slimline Model 36 combination rear lights for box and boat trailers; Model 41 and the upgraded Model 42 rear combination lamps. The bold and stylish range of 130mm round Model 43 L.E.D lamps include options such as an elegant chrome surround and an outstanding L.E.D tail ring with a high-end neon appearance.

The extensive new catalogue from NARVA offers something for all markets such as industrial, mining, heavy transport, motoring, 4WD and boating.

The exciting 2010 Narva New Product Catalogue is available NARVA New Zealand and stockists now.
