Elegant NARVA L.E.D Downlights Add a Touch of Class

A new line of flushed-mounted L.E.D downlights just released by automotive lighting specialist NARVA in New Zealand will add a touch of class and elegance to the interior of any caravan, motor home or boat.

Featuring a stylish brushed metal fascia ring and body with a frost lens, there are two versions of the new downlight available; one option has a powerful 1 Watt L.E.D. or there's the high-powered 3 Watt L.E.D, both delivering exceptional crisp white output with an impressive spread of light.

The two lamps use multi-voltage 9-33 Volt L.E.D's with exceptionally low current draw making them ideally suited to a wide variety of applications. Each comes pre-wired and includes spring clips for quick and secure snap-in fitment.

NARVA New Zealand says they are ideally suited for use in caravans and boats due to their low battery draw and they take up very little space in the ceiling cavity.

NARVA[®] *Press Release*

The new multi-voltage NARVA L.E.D downlights are available from leading automotive outlets throughout New Zealand under part numbers. 87580 (1 Watt) and 87581 (3 Watt).
