So Many Uses... So Little Time!

Plasti Dip is a multi-purpose air dry, synthetic rubber coating that can be easily applied by brushing or dipping. It dries to touch in 30 minutes and is ready for use in 4 hours. Plasti Dip resists moisture, acids, abrasion, corrosion, skidding/slipping, and provides a comfortable, controlled grip. It remains flexible, stretchy and will not become brittle or crack in extreme weather conditions; Plasti Dip is being used on everything from model cars to crafts; automotive projects to circuit boards; fishing lures to underground wiring; sports equipment grips to underwater aquariums.

1000's of uses – automotive, marine, sporting goods, electrical, hobbies, workshop, home and garden, manufacturing, outdoors.

Flexible – won't crack, chip or become brittle.

Insulates – Electrical shock, vibration, heat, deadens, sound.

Grip – provides safe non-slip comfort and control (non-skid grit can also be added).

Durable – resists weather, chemicals, impact and abrasion. **Assorted Colours**

Brush on Insulation

Performix **Liquid Tape** Insulation Coating is being used on electrical connections everywhere. From speaker cables to circuit boards; automotive projects to toggle switches; extension cords to underground wiring; terminal blocks to underwater aquarium pumps.

Liquid Tape is a rubber insulation coating that exhibits excellent acid, alkaline, abrasion protection and seals out moisture and salt permanently. Liquid Tape has the strongest dielectric protection on the market; 1,200 v/mil, 5-7 mils per coat. Liquid Tape will not harden, unravel or become brittle in extreme weather conditions.

Trouble Free – won't unravel like tape. Seals out moisture, salt permanently.

Easy to apply – Convenient applicator brush in cap.

Flexible Rubber Formula – won't crack, peel or harden.

Available in Black or Red
